Company Overview

Founded in 2005, Radiant Cash Management Services Ltd. (RCMSL) is an ISO-certified company offering integrated cash logistics services. The company operates its services under five business verticals which include cash pick-up and delivery, network currency management, cash processing, cash vans /cash in transit, and other value-added services. The company's client base encompasses some of the largest foreign, private, and public sector banks, with Axis Bank, Citibank, Deutsche Bank, HDFC Bank, ICICI Bank, Kotak Mahindra Bank, Standard Chartered Bank, State Bank of India, The Hong Kong and Shanghai Banking Corporation Limited and Yes Bank being their key clients. Additionally, in the end user segment, they have diversified their services into multiple sectors including e-commerce, retail, NBFCs, insurance, e-commerce logistics, railways, and retail petroleum distribution. RCMSL has been servicing its clients through 739 fabricated armoured vans and a support team consisting of 8,780 employees and contractual workers. As of July 31, 2022, the company extended its presence to 55,513 touch points, covering 13,044 pin codes across all districts in India (other than Lakshadweep).

Objects of the issue

The IPO proceeds of the fresh issue will be used towards the following purposes:

- a) Funding working capital requirements;
- b) Funding capital expenditure requirements for the purchase of specially fabricated armoured vans;
- c) General corporate purposes.

Rating: **AVOID**

Investment Rationale

Higher focus on network currency management and other value-added services and favourable industry dynamics to drive business growth

The RCM market is estimated at Rs.6.8 billion in FY2021 and is projected to grow at a CAGR of 20.3% to reach a market size of Rs.20.4 billion in FY2027. The company provides retail cash management services (except ATM-related services), with a focus on network currency management and other value-added services. This provides the company with better pricing power and operating leverage compared to ATM-related services, leading to higher margin realizations. It is to be noted that RCMS is in the top three players that account for more than 75% of the total market share of the RCM market. Moreover, regulations in the industry are designed to ensure that cash management companies meet certain operating standards concerning the handling of cash. This industry policy is in the company's favour as it is expected to drive further consolidation and create high entry-level barriers for other new players.

Strong presence in Tier 2 and Tier 3+ locations

As of July 31, 2022, out of the total touch points covered by the company, 86.1% of touch points were located in tier 2 and tier 3+ towns and cities which contributed about 85.6% of the total revenues of the company. With the government's financial inclusion programs like Pradhan Mantri Jan Dhan Yojana and other direct benefit transfers in place, cash utilization and circulation is expected to grow further in tier 2 and tier 3+ towns and cities, leading to an increase in the demand for cash management services in these areas. Moreover, a higher preference for cash management services among retailers, NBFCs, restaurants, insurance companies, and railways, especially in lower-tier cities, is likely to fuel growth for the company's business.

Valuation and Outlook

Radiant Cash Management Services Ltd. is one of the largest players in the RCM segment in terms of network locations served in the industry. The company believes that increased financialization and formalization of the Indian economy will require a greater amount of cash to be processed and in circulation, benefitting the company in the long run. In addition, the company aims to shift its business mix towards providing more value-added services which will help to improve the margin profile. However, RCMSL is exposed to multiple operational risks and is subject to seasonal fluctuations in the end-user industries. On the upper end of the price band, the issue is valued at a P/E of 26.3x based on FY2022 earnings which we feel is on the steeper side compared to its peer group (SIS Limited and CMS Info Systems). We, therefore, recommend an "AVOID" rating for the issue.

Dec 22, 2022

Key Risks

- > The company's revenue from operations is heavily reliant on its top five customers
- > A decrease in the availability or use of cash as the predominant mode of payment in India could have an adverse effect on the company's business operations.
- > The business has significant expenses with employee benefits. Any material increase in any of these expenses could affect its ability to maintain or increase profitability.
